Admin Instructions: 1. Give as scheduled on admission or alternate date and time ordered by the provider using the "Given" MAR action. If it is not possible to administer the vaccine at the scheduled date and time, the nurse or pharmacist may reschedule the administration for up to 24 hours later. The nurse will give the vaccine BEFORE discharge if patient will leave prior to scheduled administration. Provide current Vaccine Information Statement (VIS) to patient prior to vaccination and document in Immunization Information box on MAR.

2. If the patient or caregiver refuses the vaccine, document using the "Refused" MAR action with patient's stated reason for refusal in the comment and notify physician of refusal. Confirm refusal before discharge.

3. If the patient has already received the influenza vaccine this season which is not yet documented in Immunizations, document a HISTORICAL administration in Immunizations.

Notify the physician to discontinue the flu vaccine order.

Patient has had a bone marrow transplant within the last 6 months.

4. If any of the following contraindications exist, notify the physician of the contraindication to place orders for both "Do Not Administer Flu Vaccine" order and "Discontinue" flu vaccine order. Patient has allergy/sensitivity to influenza vaccine including Guillain Barre Syndrome within 6 weeks of getting vaccine (confirm documentation in Allergies)

Patient will have an organ transplant during this hospitalization

5. If the patient has a condition or order specifying that IM injections are contraindicated, confirm with physician that the vaccine should be held. Document using the "Held" MAR action with reason. Confirm the contraindication still applies upon discharge.
